Rainbow Scavenger Hunt

"Strangely colored fungi — mustard-yellow and apricot and scarlet — are pushing out of the leaf mold and all the lichens and the mosses have come alive with green and silver freshness."

- Rachel Carson

If you've ever seen a rainbow, you've spotted the hidden colors of sunlight! Join us in uncovering the hues hiding in plain sight. Try to spot plants, fungi & animals in all of these colors. Can you find two different organisms for every sunshine shade?
