# Flowering Plant Life Cycle Scavenger Hunt

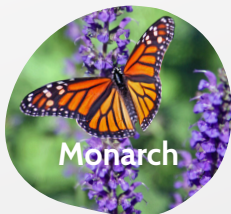

**Fruiting & Dispersing Seeds**

**Sprouting & Growing Up**

Did you know there are over 400,000 flowering plants around the world? Join us in seeking these stages of their lives! While you're hunting, see if you can find other seeds, fruits, sprouts, flowers, and even pollinators! While some plants self-pollinate, many couldn't survive without the help of pollinating critters!
